shraddha

shraddha11953

Motivated and dedicated MCA student with strong foundational knowledge in Python, Django, and MySQL. Experienced in developing full-stack web applications. Successfully built real-world projects like a Farmers Assistant App and a SkillSwap platform, focusing on database management, user authentication, and responsive design.

Technical Skills

Languages: python (with Object-Oriented Programming), HTML, CSS, JS, PHP, C, CPP

Core CS Skills: DSA, Computer Networks, Operating Systems, OOP, DBMS

Frameworks: Django, Angular.js

Databases: MYSQL, MONGODB

Developer Tools: VS Code, GIT, GITHUB, PYSCRIPTER

Projects

Farming Assistant Web Application | Django, sqlite, HTML/CSS, JavaScript

- Developed a Crop recommendation system based on real-time soil and weather conditions
- Integrated weather forecasting with alerts for temperature and rainfall
- Dynamic crop market price updates from reliable sources
- AI-based crop disease detection using image upload functionality
- Online marketplace to connect farmers directly with buyers

SkillSwap Time-Based Barter Platform / Django, Django Channels (WebSockets), sqlite, HTML/CSS, JS

- A unique skill-exchange web app where users trade skills using time as currency.
- Time-credit-based skill exchange system (e.g., 1 hour of coding for 1 hour of language teaching)
- Real-time chat system implemented using Django Channels
- Calendar integration for scheduling sessions
- Profile dashboard with skill listings, ratings, and history

TrackMe – Location Tracking via SMS / Django

- A location tracking web application that processes SMS-based location data for monitoring users.
- Tracks user location using SMS input and stores location data securely
- Displays user location history via a web interface
- Designed for use cases like child safety, elder tracking, or logistics

Relevant Coursework

- Data Structure
- Operating Systems
- Computer Networks
- Database Management

Experience

ExcelR Bengaluru karnataka

Full Stack Development Trainee

Office Employee Management System

- Developed a web-based application for HR personnel to efficiently manage employee records.
- Implemented features for creating, updating, deleting, and filtering employee details.
- Designed intuitive UI and integrated backend functionality using Django and sqlite Projects.

Feb 2025-Present

Bengaluru, karnataka

Education

Vishwakarma University Pune

Masters in computer application: CGPA 8.2/10

Shivaji University Kolhapur

B.Sc.- Mathematics : CGPA 8.68/10

Aug 2023 – Jun 2025

Pune, Maharashtra

Aug 2020 – Jun 2023
